

SHUBH UMRE

Machine Learning Engineer (Student) | Jabalpur, Madhya Pradesh | 7400934677 | umreshubh6@gmail.com |
github.com/shubhumre777 | linkedin.com/in/shubh-umre

PROFESSIONAL SUMMARY

Machine Learning-focused Computer Science student Developed scalable machine learning systems across NLP and financial datasets enabling intelligent automation and improved analytical decision support. Engineered predictive pipelines handling real world structured data improving model reliability and operational efficiency. Deployed machine learning applications supporting real time inference and data driven workflow optimization.

TECHNICAL EXPERTISE

Programming	Python, SQL (Foundational)
Machine	XGBoost, Random Forest, Logistic Regression, NLP, Supervised Learning, Ensemble Methods
Learning ML	Feature Engineering, Cross-Validation, Hyperparameter Tuning, Model Evaluation, Imbalanced Data Handling
Techniques Data	EDA, Statistical Analysis, Data Cleaning, Structured Data Processing
Analysis	Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, NLTK
Libraries Tools	Git, GitHub, Streamlit, Jupyter Notebook
Core Knowledge	Probability, Statistics (In Progress), Bias-Variance Tradeoff, Predictive Modeling

MACHINE LEARNING PROJECTS

Email & SMS Spam Detection System | Python, NLP, Scikit-learn, Streamlit

- Designed a text classification pipeline using TF-IDF vectorization and supervised learning algorithms.
- Performed comparative model selection and engineered features to improve prediction consistency.
- Deployed a web-based interface enabling real-time inference.

Credit Card Fraud Detection Pipeline | XGBoost, Random Forest, Logistic Regression

- Developed a predictive pipeline for fraud detection on highly imbalanced transactional datasets.
- Applied feature selection, normalization, and ensemble modeling to enhance robustness.
- Evaluated models using cross-validation and precision-recall metrics aligned with financial risk scenarios.

Aadhaar Demographic Intelligence Platform | UIDAI Hackathon

- Analyzed 50,000+ demographic records to identify regional patterns and anomalies.
 - Automated preprocessing workflows using Python and SQL for scalable analysis.
 - Delivered structured insights supporting data-driven decision-making.
-

EDUCATION

B.Tech – Computer Science Engineering (AI & ML), Baderia Global Engineering College | Expected 2027

Relevant Coursework: Machine Learning, Probability & Statistics, Data Structures

CERTIFICATIONS

AI Fundamentals – Google

Introduction to Generative AI – Microsoft

Python Programming – Scalar School of Technology

Machine Learning – IIT Bombay
